688 East Chad Ranch Road
Veyo, Utah 84782-4141

Dear Mr. Feller:

On February 6, 2007, you received a letter from this office informing you that your existing notice for mining operation serialized U-75737 expired on January 22, 2007 in accordance with 43 CFR 3809.333. You were informed that all mining operations must cease immediately and the only activities currently permitted are those activities related to reclamation of the surface disturbance associated with your mining operations. If you choose to continue mining at this location, then a Plan of Operation would need to be submitted and approved with this office.

On September 21, and October 4, 2007, field inspections were conducted on your Fisher Creek operation U-75737, and it was noted that there has been some activity conducted during the current field season. There was some equipment and debris found within and around the pit/quarry area including an excavator needing repair, a track mounted drill, an RV and other items. There was one basket of rock on-site and it also appears that someone has backfilled the quarry face to some extent.

Since this activity has apparently been conducted without an authorization, in order to avoid trespass proceedings against you for this activity, please contact this office within 10 days of the receipt of this notice and provide us with an up-date on the status of this mining operation.

If we do not hear from you within the stated timeframe, you may be placed into non-compliance with Bureau of Land Management and action initiated against you for unauthorized activity on public lands.

If you have any questions, or require additional information, please contact Larry Garahana of my staff at (801) 977-4371.

Sincerely,

David H Murphy
Assistant Field Manager
Nonrenewable Resources
